

The Australian Network for Art & Technology (ANAT) is excited to once again announce a unique residency opportunity for Victorian-based artists.

After the successful delivery of three artist residencies of three months' duration at the cutting-edge Advanced Manufacturing facilities in Clayton in 2017, the CSIRO and ANAT are offering a further three residencies, to take place between August – December this year.

ANAT and the CSIRO have identified three research areas with the right mix of compelling science, coupled with researchers committed to working collaboratively with artists and providing the necessary level of support.

Residencies are available in the following research areas:

[Metal organic framework materials](#)

[3D printed metal structures](#)

[Polymer coatings for cell adhesion](#)

Each of the research leads will be present at *Experimenta Social #19* to meet with artists and to discuss opportunities for interdisciplinary artist-led research in their respective areas.

WED 18 JULY 2018 at ACMI X Studio

LOCATION: Level 4, 2 Kavanagh Street, Southbank, Melbourne, VIC

EVENT TIME: 6:00PM DOORS / 6:30PM START
